

StudentDV

2007-2008 – Show 31

This month on Student DV...

Andrew Carnegie Middle School shows us why gum is gross, We'll see an inspirational story from Center High School, and Nick G. The Science Geek will stop by with one of his science experiments.

Nick G. The Science Geek – Dead Sea (24:38)

Do you know how deep the Dead Sea is? Nick G. The Science Geek does. On this episode Nick talks about how saltwater can cause things to float. He'll demonstrate a simple and exciting experiment that you can do at home! This one is sure to wow the friends while learning about science at the same time.
