

StudentDV

2007-2008 – Show 39

This month on Student DV...

Will Rogers Middle School teaches us the importance of homework, Pershing Elementary School shows us some basketball basics, and students from Sam Brannan Middle School present a documentary about Holocaust survivor Frank Rothman.

Nick G. The Science Geek – Aqua Man (26:45)

You might think that a cup of water turned upside down will pour all over the floor. Nick G. The Science Geek defies gravity by using a scientific principle to show that this belief isn't *always* true. A cup, a card, some water and the earth's atmosphere will be all you need to do this experiment at home. Huzzah!

Featured Interviews & Videos

Quinn Watson – *Sidewalk Safety* – Bannon Creek Elementary School **(00:34)**
